Cindy;

DoD
General Dynamics
Austin Powder

And a couple more that escape my memory just now. I will have to look for the names and addresses. These are names we have found in our document searches and interviews with the facility personnel.

If I understand correctly, the End User Certificates represent material that Explo sold to other parties. How can I find out who besides General Dynamics (the Army) send explosives to Explo? Am I overlooking something?

Yes, there were 6 facilities Explo sold explosive/reactive materials to. There were 2 facilities that Explo sold scrap metal to. There were 3 or 4 that sent materials to Explo for demil.

Chuck, I am working flexiplace today, and going through a lot of the Explo information in my possession.

Can you tell me if we have any evidence that Explo had any other customers, other than General Dynamics and the Army?
